

ATTENTION SCHOOL AND COLLEGE HEADS, SITE MANAGERS, BURSARS AND BUSINESS MANAGERS!

In a few days you can become compliant with the asset inventory requirements of FMSiS

WHAT WE DO

A small team of experienced CRB checked auditors discreetly tagging, describing, and logging all your property from furniture to computers, cameras to site machinery. Extremely productive at 500 items per auditor per day so we're not on site for long.

WHAT YOU GET

Rapid knowledge of type, make, model, and room. Everything above a threshold uniquely tagged. Improved theft deterrence and proof of ownership. We can even deliver serial number, estimated value and condition. A database of what's in each room. Confidence in answering OFSTED and LEA queries.

WHAT IT COSTS

Our audits are fast, accurate and cost effective. For every 200 pupils the guideline charge is only £460 ex VAT, including adhesive labels and data report on XL or published to a secure website with password access. If you want to import the results into our asset tracking system and do the job yourself, just call us for a demonstration of our tag, scanner, and software solution. While we're on the job we can also carry out your PAT testing too!
